

SG-SIM-MD80-01

PRESENTATION

MD80 Static FTD (Fixed Training Device) Flight Simulator

Originally belonged to the Alitalia training center in Fiumicino like DC9 I-DIKA who educated and coached all the DC9 pilots of the time.

The cockpit consists of:

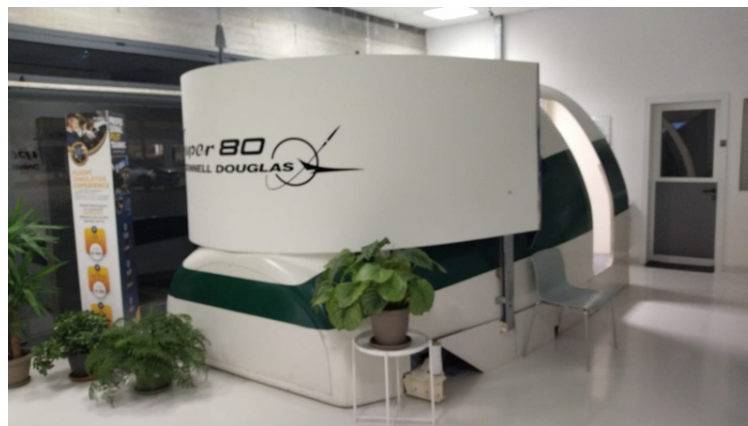

- shell that faithfully reproduces the DC9-80 on a 1:1 scale with the instructor part and passenger seats (if there is no space, the two parts detach)
- Original MD80 panels and instruments + replicas of panels with fidelity and functionality 100%.
- all flight controls worked
- instructor station for management of breakdowns and weather situations
- 3 x 65" 4k TVs
- 2 PCs
 - 1 dedicated to visual (i9 10900kf + GTX3090 NVME disks)
 - 1 dedicated to slave instrumentation with 12 mini monitors
 - Prepar3D v5 platform + Leonardo Maddog Professional.

It was used in our experience center suitable for flight enthusiasts which have a space to allocate with a size of 5x3 MT wide x 2.5 MT H.

FOR FLIGHT TRAINING CENTERS - FLIGHT SCHOOLS - AIRLINES - DISCOVERY CENTERS
